Stratford General Hospital

## Attention Graduating Psychiatry Residents: Two Positions Available

- Have you completed your FRCP examinations?
- Are you eligible for licensure in the Province of Ontario?
- Are you interested in a flexible work schedule?
- Are you interested in a flexible and generous vacation schedule?
- Are you interested in World Class Theatre and Dining?

HarrowSmith magazine has called Stratford, Ontario one of the “ten prettiest towns in Canada.” We enjoy world-class restaurants and theatre, outdoor cafes, and a vibrant artistic community. Stratford balances the benefits of a friendly small town with the international tastes of an urban population.

Our hospital has eighteen Schedule I inpatient beds and 550 admissions per year staffed by an experienced multidisciplinary team. We are developing a new inpatient unit and are expecting the project to be complete in 2008. Our outpatient programs are innovative with a strong emphasis on Cognitive Behavioural Therapy, Group therapies and Dialectic Therapy. We have a wealth of outpatient programs and an exceptional and committed team. We use evidence-based therapeutic tools with a definitive leaning towards the cognitive behavioural models. We have a very active continuing medical education program for staff and support ongoing education with the entire team.

As affiliates of the University of Western Ontario, successful applicants have the opportunity to pursue academic appointments and become part of the regular teaching team for medical students and residents.

Currently we are expanding our programming to meet the demands of the community and of our upcoming role as a core teaching site for psychiatry residents from UWO. Our recruitment package will include moving expenses, site visits, and sessional payment opportunities in addition to fee for service income.

Please forward a letter of introduction and your CV to Dr. Cleto or Gwen Devereaux:

Dr. Luis Cleto, M.D. F.R.C.P. (C)  
Psychiatrist, Special Services Unit  
90 John Street South
