

WEB LINKS

There are several websites dedicated to the protection of the environment. Reducing our ecological footprint is necessary to provide a sustainable future for generations to come. Data from 2005 suggests that it would require 2.7 Earths to meet current demands of the population. Canada's ecological footprint is ranked 7th worst, with our CO₂ emissions (pollution) putting us as one of the top ten offenders.

Reducing our pollution, curbing our usage through efficiency and reduction, and repairing our ecosystem is easy once you are armed with the knowledge. The sites below will help you gain the information to take steps toward a carbon neutral existence.

Linking Considerations

In order for the internet site to better help the End Users, links have been provided to third party sites that are not maintained by the City of Stratford. These sites are subject to copyrights held by their own organizations. The City of Stratford has no control over the content that may be contained in these third party sites. Their inclusion does not imply that the City of Stratford endorses or accepts any responsibility for any of the content these links may have. The City of Stratford does not guarantee that the contents of the third party sites are complete, up-to-date, and free of errors, viruses or any other items of a malicious nature. By your accessing these third party sites through our web site, you agree that you have made this decision entirely at your own risk and discretion.
